Instrument & Control Technician

To apply please send resume to careers@trtlp.com

Summary – Twin Rivers is seeking highly motivated Instrument Technician to perform field work on instrument and controls installation and repair in a manufacturing workplace. The candidate must be able to work in a team based environment with a flexible schedule including overtime.

Key Areas of Responsibility

- Troubleshoot, maintain and calibrate Industrial Process Control Instrumentation; pressure, temperature, flow, levels, environmental analyzers etc.
- Responsible for ordering replacement parts and maintaining parts inventory
- Responsible for recording and maintaining data sheets, technical documentation
- maintenance sheets and records, MSDS safety records, etc.
- Willingness to support after hours troubleshooting calls and services requests
- Responsible for resolving process production problems
- Complete equipment maintenance inspection logs
- Peer and management information sharing
- Customer/supplier, tenant and vendor interface

Required to support scheduled and non scheduled maintenance projects. Various types of work under minimal supervision including, troubleshooting and maintaining electrical control systems, process control systems, instrumentation, and operator interface terminals for large scale manufacturing. These systems contain multiple PLCs, Servos, HMIs, Instruments and Inspection systems. You are responsible for keeping production flowing, meeting performance goals and maintaining the high level of quality that consumers expect from our products. We want you to get involved, take charge of situations and confront business-related problems.

Formal Education/Certification Requirements – Essential Functions

- MA Journeymen Electrical License preferred
- Self motivated, capable of working independently and within a team environment.
- Possess a strong mechanical aptitude and be proficient troubleshooting and repairing mechanical, pneumatic, hydraulic and electrical equipment and devices.
- Ability to work at heights.
- Self starter and able to prioritize events and switch focus rapidly.
- Able to understand and mark up P&IDS, Loop Sheets and drawings.
- Familiarity with PLC's and DCS systems, Allen Bradley and Honeywell would be a plus.
- Ability to communicate effectively with vendors, engineering staff, other technicians and production personnel.

Physical Requirements/Working Environment and Conditions

- Tasks performed are exposed to all weather conditions.
- Require the usage of personal protective equipment (PPE) and may take place in confined spaces.
- Duties involve frequent walking, standing, lifting, pushing, pulling and carrying objects up to 40lbs.
- Climb stairs and ladders to heights of 120 feet.
- Lifting of equipment up to and exceeding 40lbs to perform maintenance duties
- Turn valves, move handles, work overhead.
- Support TRT's annual shutdown – OT will be necessary

Hours: M-F 6:00 AM – 2:30 PM
